*Re: Processing of Crandon Mine Application*

Dear Ms. DeVetter:

This letter is to make clear that Nicolet Minerals Company ("NMC") requests continued processing of its Mining Permit Application that is on file with the Department. In this regard, the Department should continue processing all pending applications and approvals for the Crandon Mine Project. DNR should also continue working on the limited remaining items necessary to prepare the Draft Environmental Impact Statement ("DEIS").

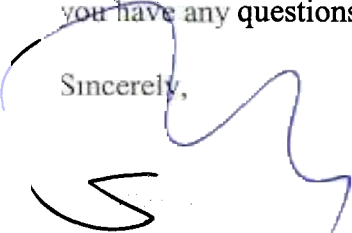

As you are aware, NMC requested a stay of the approval process in a letter dated May 29, 2003. However, despite that request the DNR and United States Army Corps of Engineers ("USACE") continued with the permitting process.

Likewise, NMC also continued actively working on the application since May 29<sup>th</sup>. For example, NMC continued talking with the DNR and its consultant, Fred Brackebusch, concerning technical issues associated with the application. On July 28, 2003, NMC filed a response to the DNR's May 21, 2003 letter on paste backfill matters. NMC also continued working on questions concerning the December 1998 Wis. Stats. § 293.50 Compliance Demonstration and anticipates filing a supplement in the near future.

Given recent discussions with the DNR addressing the issues that initially triggered our request for a stay, we are now withdrawing our request, notwithstanding and recognizing

the fact that both the DNR and the Corps continued with the permitting process. We look forward to working with the WDNR and USACE on this matter. Please give me a call if you have any questions.

Sincerely,

Gordon R. Connor  
Project Manager
